Yaraku Translate's API Introduction

*Former service name: YarakuZen

# About Yaraku Translate's REST API

Translation with your own customized engine

If accumulating translation results in your own Phrases and Glossary, saved results will be reflected in future machine translations, allowing you to build your company's linguistic assets using the API.

Secure multiple translation engines to choose from

You can freely choose from multiple translation engines without the risk of information leakage. You can choose the engine that is most suitable for your translation field and your API use purpose.
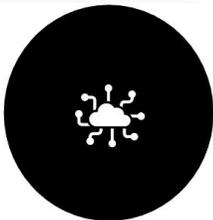

Differentiate the usage according to your needs.

Systems that require daily translation can be linked via API to translate the text seamlessly, while our Yaraku Translate app can be used to translate files and emails used in daily work. Also the translation of external documents can be outsourced to professional translation agencies, if ordering them using out Translation service. Yaraku Translate allows you to use various services, depending on your needs.

About the official release (as of June 12th, 2023)

Currently, we only released the beta version, and we will be working on improving

potential bugs and issues during the beta period. Even during the beta period, the

product itself is the same as the official version, so there is no problem in starting the

free trial or officially using the API.

We will provide the same support as after the official release.

Contract/Trial

YARAKU

Yaraku, Inc. only provides an API key.
Your company will be in charge of connecting the API key to your company's system and web page's

development.

What is included in the contract?

- Yaraku Translate's company account with the Yaraku Translate's API option.
    - The number of required accounts depends on the number of keys you want to use with the

        API.

    - You can specify one per machine translation engine for each API key, although multiple

        company categories can be selected.

    - One key is issued for each user account.

Example: If you want to use both Google and Microsoft engines, you will need two separate user accounts

 Would you like to try out our API?

Please let us know which user account will be used for setting up the API key.
A free trial from 2 weeks to 1 month is available upon request.

Fees

Monthly fees are based on the actual usage volume, counted by source characters. We will prepare a annual fee quote based on the expected usage volume.

Item name	Unit	Monthly price
Initial fee	One time	￥150,000
Monthly usage below 5 mln. ch.	Monthly price	￥50,000
Monthly usage below 10 mln. ch.	Monthly price	￥90,000
Monthly usage below 20 mln. ch.	Monthly price	￥160,000
Monthly usage below 50 mln. ch.	Monthly price	￥400,000
Monthly usage below 100 mln. ch.	Monthly price	￥750,000

*The plan for the next six months is updated every six months based on the actual number of characters used.

API Settings page

YARAKU

In Yaraku Translate's Settings page under Integration>API, a user can select preferable machine translation engine and applicable company categories, check daily and monthly usage limits and the usage history.

Click the "Generate API keys" button to generate the Translate API v2 key in the Integration>API page and select the engine and company categories.

*If Yaraku Translate engine is selected, only English and Japanese translations will be supported.
